DETAILED ACTION

Response to Amendment

1. This is in response to applicant's amendment received on 4/24/00 in which claims 1-21 are pending.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.
- 3. Claims 1, 4-5, 10-12, 15-17, 20-21, are rejected under 35 U.S.C. 102(e) as being anticipated by Ueda (JP 4053034469 A).

As to claims 1, 12, 16 and 17, Ueda (figs. 1-3) show a method for entering data into a computer, comprising: anchoring an electrical cord (2) connecting a peripheral input device (1) to the computer positioning the peripheral input device; and retracting slack in the electrical cord as the peripheral input device is positioned (see abstract).

As to claims 10 and 11, Ueda (figs. 1-3) show a method, wherein retracting slack in the electrical cord includes retracting the slack into the peripheral input device and an anchor...

Art Unit: 2775

As to claim 15, Ueda (figs. 1-3) discloses a method, wherein moving the peripheral input device includes moving a mouse and a pointer displayed by the computer.

As to claims 20 and 21, Ueda (figs. 1-3) show a method, wherein positioning the mouse includes positioning a pointer displayed by the computer and wherein retracting slack in the electrical cord includes retracting the slack into at least one of the mouse and an anchor.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claim rejected under 35 U.S.C. 103(a) as being unpatentable over Ueda in view of Lundberg (U.S. Pat. No. 5,844,775).

As to claims 2-3, 4-9, 13-14, 18-19, Ueda does not teach anchoring the electrical cord includes anchoring the electrical cord to a desktop or a mouse pad and, wherein anchoring the electrical cord includes at least one of adhering and fastening an anchor to the desktop and a computer chassis.

However, in the same field of endeavor, Lundberg (figs. 10, 11, 12, 16, and 19) show a method, wherein, anchoring the electrical cord includes anchoring the electrical cord to a desktop and a computer chassis (see fig.16); wherein anchoring the electrical cord includes at least one of

Application/Control Number: 09/069,728

Art Unit: 2775

adhering and fastening an anchor to the desktop; wherein anchoring the electrical cord includes

Page 4

anchoring the electrical cord to a mouse pad (16); wherein anchoring the electrical cord includes

at least one of adhering and fastening an anchor to the mouse pad (16); wherein anchoring the

electrical cord to the work surface includes anchoring the electrical cord to a desktop or a mouse

pad (col. 3, line 46 through col. 4, line 10); wherein anchoring the electrical cord to the work

surface includes at least one of adhering and fastening an anchor to the work surface.

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the

invention to improve upon the mouse cable holder as taught by Lundberg because that would

eliminate the excess of slack in the electrical cord which is a nuisance and, the cord is liable to

knock over or otherwise bother whatever is sitting on the support table for the mouse pad.

Conclusion

6. Applicant's arguments with respect to claims 1-21 have been considered but are moot in

view of the new ground(s) of rejection.

7. The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure. See attached form PTO-892.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

or faxed to:

Page 5

Art Unit: 2775

(703) 308-9051, (for formal communications intended for entry)

Or:

(703)308-6606 (for informal or draft communications, please label

"PROPOSED" or "DRAFT"

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington. VA., Sixth Floor (Receptionist).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fritz Alphonse whose telephone number is (703) 308-8534.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steve Saras, can be reached on (703) 305-9720.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 305-3900.
